

# Custom Medical Model Project Brief

A starting brief for anatomy, pathology and skills-training model projects.

ENGLISH / FILLABLE PDF / 2 PAGES / REV 1.0

## 01 / YOUR PROJECT & CONTACT

**Company / institution**

**Business contact name**

**Business email**

**Country / delivery region**

**Project name / reference**

## 02 / DEFINE THE STARTING POINT

**Target anatomy / pathology**

Describe the structures, scale and proposed lesions. Omit case identifiers.

**Intended use / training task**

Who will use the model? What should they explain, access or practise?

**Material feel / visibility**

Describe flexibility, transparency, layers and handling needs. List unknowns.

**Complete what you know; write 'To discuss' for open points.**

Fill and save a copy in a PDF reader, or print and complete it. This file does not submit any information. Continue technical details on page 2.

## 03 / TECHNICAL SCOPE & PROJECT REVIEW

### Structures and instrument access

Specify connected structures, access routes and relevant instrument dimensions.

### Modules / replacement needs

List removable parts, interchangeable lesions or replacement elements to discuss.

### Handling and use environment

Describe repeated-use, cleaning and storage expectations for technical review.

### Quantity / destination

Estimate models or teaching sets, batch plans and delivery country or region.

### Design / sample review

Who reviews the result? What features and acceptance criteria should be agreed?

### Project planning (if known)

Note a preferred schedule, optional budget range and requested documents. To be agreed.

#### Share a non-sensitive brief when you are ready.

Email your saved business brief to [info@maxseas.com](mailto:info@maxseas.com), or summarize it in the website enquiry form. No patient information or medical images. Any authorized image transfer is agreed separately. Scope, suitability, price and timing require project-specific confirmation.
